factory.pyfilters.pycredentials.py

adapters/base.py

BrokerAdapter (ABC)

connect · disconnect · 14 abstract methods → all return Envelope

adapters/ig_adapter.py ✓ full

IGAdapter raw REST · EUR · DAX CFD

session connect · disconnect · re-login on 401

market get_price · get_ohlc · get_historical_ohlc · get_market_info · search_markets

account get_account · get_open_positions · get_trade_history

orders open_position(MARKET|LIMIT|STOP) · close_position · modify_position · reconcile_positions

401→re-login · 405→MarketOffline · 429→backoff

deal_reference idempotency · confirm polling · v1/v2/v3

orders: MARKET · LIMIT · STOP · stop/limit levels

spread_pct · calc_position_size in filters.py (Code, not AI)

external · IG Markets REST API

live: api.ig.com/gateway/deal

demo: demo-api.ig.com/gateway/deal

auth: CST + X-SECURITY-TOKEN headers · 6h sessions

streaming/

PollingStreamClient ✓ ready

REST polling fallback · configurable intervals · thread-safe · PriceTick(epic, bid, ask, ts) callback

swap to Lightstreamer: 1-line change in factory

credentials.py · OS keyring

get_credential(name) → keyring.get_password(SERVICE, name)

store via: python scripts/store_credential.py <name>

demo: ig_demo_username · ig_demo_password · ig_demo_api_key · ig_demo_account_id

live: ig_username · ig_password · ig_api_key · ig_account_id

macOS: Keychain · Linux: gnome-keyring · Win: CredMgr

fallback_env=True for CI/demo only, never production

AI reads get_credential() at runtime – no plaintext files

scripts/store_credential.py uses getpass – input hidden

envelope.py · standard response shape
